WORK HISTORY

Software Quality Assurance Engineer

WOLTERS KLUWER | JAN 2016 - PRESENT

- Leveraged my attention to detail to uncover bugs and enhance business requirements.
- Utilized a customer mindset to identify enhancements to improve user satisfaction.
- Designed manual and automated tests for over a dozen web applications offered by the company, using testing techniques and user requirements.
- Collaborated with members of my development team to strive for quality work.

Business Systems Analyst

WOLTERS KLUWER | APR 2015 - JAN 2016

- Reviewed customer and internal team information to figure out ways to implement or improve software features.
- Communicated with product stakeholders and team members to discuss current issues, future features and desired changes.

Software Developer

OATI | MAR 2014 - FEB 2015

- Created and maintained code for web applications in the energy industry.
- Wrote bug fixes and enhancements for back-end applications for web and database servers.
- Investigated and debugged problems reported internally and by customers.
- Performed code reviews and walk-throughs with other developers.
